

Evidence 2.5.3.2:

University Provides Access to University Facilities (e.g. labs) to Local Farmers and Food Producers to Improve Sustainable Farming Practices

Our university believes in sharing resources, including lab facilities, with local farmers and food producers. This access enables them to learn and apply sustainable farming methods. By offering technology and support, we aim to help them boost productivity while taking care of the environment. Our goal is to create a collaborative environment where farmers can benefit from university expertise and contribute to the advancement of sustainable agriculture in the community. It's a collective effort toward fostering innovation and resilience in local farming practices.
